

Good afternoon!

First of all, I'd like to say I'm so happy to have the opportunity to be here today.

My name is XXX. I'm from Huazhong University of Science and Technology, majoring in XXX.

Last month, I just got the privilege to enter the graduate program waived of the admission test. I selected the Institute of Engineering Thermo-physics of Chinese Academy of Sciences to continue my study for its best reputation on XXX where my research interest lies. This is the first reason. Secondly, I like the academic atmosphere here. Everybody here seems so busy, and this will drive me to work harder to improve myself. Thirdly, you know, Beijing is a highly-developed city. Here offers me a gold opportunity to experience new things and expand my horizon.

In the past three years, I've been working very hard. And the results are encouraging: I ranked No.8 in my grade with 429 students in total. And I really hope to be excellent here as how I was before.

During this summer, I've designed a system of recycling energy from waste water. And I'll compete in the National Competition of energy conservation and pollution reduction designing in Zhejiang University next week. And during my working, I find out that my knowledge is very limited and superficial, so it is urgent to take further steps to change this state.

As for my personality, I am open-minded, quick in thought, creative and easy-going. I am interested in computers, swimming and music. In my spare time, I also like reading books, especially those about self-improvement and how to deal with the tough things in our daily life. I also love basketball, not playing, just watching it. And Yaoming is the greatest basketball star in my heart. I think a basketball game is just like life, it is not until the end that one knows who will win.

That's all. Thank you!
